

Mobile Apps II: Week 1 Summaries

Donna Petitti

January 24, 2022

1 Abstract:

[1] The first source is "Interaction Design for Mobile Visual Search" which discusses the usage of employing visual search to connect the captured picture with the physical world. The article presents a prototype of interactive mobile visual search, named TapTell, to help users formulate their visual intent more conveniently

2 Abstract:

[2] The second source, "The Future of Apps and Web", compares mobile apps to online websites and discusses the current mobile revolution. Apps are becoming the future and are heavily being used by almost all businesses.
